

## TROPICAL CYCLONE BULLETIN NR. 7

### Tropical Depression LUIS

Issued at 5:00 AM, 03 August 2026

Valid for broadcast until the next bulletin at 8:00 AM today.

#### LUIS MAINTAINS ITS STRENGTH AS IT REMAINS STATIONARY OVER THE SEA EAST OF AURORA.

##### Location of Center (4:00 AM)

The center of Tropical Depression LUIS was estimated based on all available data at **130 km East Southeast of Casiguran, Aurora (15.9°N, 123.3°E)**.

##### Intensity

Maximum sustained winds of **55 km/h** near the center, gustiness of up to **70 km/h**, and central pressure of **1002 hPa**.

##### Present Movement

**Almost Stationary**

##### Extent of Tropical Cyclone Winds

**Strong winds** extend outwards up to **240 km** from the center

## TROPICAL CYCLONE BULLETIN NR. 7

### Tropical Depression LUIS

Issued at 5:00 AM, 03 August 2026

Valid for broadcast until the next bulletin at 8:00 AM today.

#### HAZARDS AFFECTING COASTAL WATERS

##### 24-Hour Sea Condition Outlook

**Up to moderate to rough seas over the following coastal waters:**

- **Up to 2.5 m:** The eastern seaboard of Isabela and Davao Oriental; the northeastern seaboard of Aurora.
- **Up to 2.0 m:** The seaboards of Batanes; the northern and eastern seaboards of Babuyan Islands; the eastern seaboards of mainland Cagayan, Pangasinan, Dinagat Islands, Surigao del Sur, and Davao Occidental; the northern and eastern seaboards of Polillo Islands, Catanduanes, and Northern Samar; the northern seaboards of Camarines Norte and Camarines Sur; the southern seaboard of Davao Oriental.
- **Mariners of motorbancas and similarly sized vessels are advised to take precautionary measures while venturing out to sea and, if possible, avoid navigation under these conditions.**

**Other coastal waters have forecast wave heights of less than 2.0 m.**

#### TRACK AND INTENSITY OUTLOOK

- **It must be emphasized that heavy rainfall and severe winds may still be experienced in localities outside the landfall point and the forecast confidence cone. Refer to "Other Hazards affecting Land Areas" for more details. Furthermore, the track may still shift within the limit of the forecast confidence cone.**
- LUIS will move generally northwestward and may make landfall or pass close to Northern Luzon tonight or tomorrow (04 August) early morning. Afterwards, it will sharply turn east northeastward while moving away from the Philippine landmass. The forecast track is highly uncertain and may change in the succeeding bulletins.
- LUIS is forecast to remain as a tropical depression over majority of the forecast period and may be downgraded into a remnant low by Wednesday (05 August) before becoming fully assimilated into the circulation of Tropical Cyclone DOLPHIN.

Considering these developments, the public and disaster risk reduction and management offices concerned are advised to take all necessary measures to protect life and property. Persons living in areas identified to be highly or very highly susceptible to these hazards are advised to follow evacuation and other instructions from local officials. **For heavy rainfall warnings, thunderstorm/rainfall advisories, and other severe weather information specific to your area, please monitor products issued by your local PAGASA Regional Services Division.**

The next tropical cyclone bulletin will be issued at 8:00 AM today.

**DOST-PAGASA**
